pattern.

DETAILED ACTION

1. Receipt is acknowledged of the Amendment filed April 08, 2004.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

- (e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.
- 3. Claims 1-4 and 6-12 rejected under 35 U.S.C. 102(e) as being anticipated by Robert et al. (USPT 6,335,548 B1).

Re claim 1: Robert discloses a light emitting diode having a surface mount package (Fig. 17b); a metal lead frame (204) having mass sufficient to provide thermal resistance including at least one anode contact and at least one cathode pad; a reflector (301 in Fig. 16a) positioned within the package; and a semiconductor die comprising a transparent substrate (col. 19, lines 60-63) and a light emitting component, wherein the semiconductor die connects to the metal lead via solder bridges (col. 18, lines 27+) positioned between an anode contact and a cathode contact over the reflector.

Re claims 2-3: Robert discloses a focusing dome (401) having a 120-degree illumination

Re claim 4: Robert discloses a truncated cone shape reflector (301).

Re claim 6-8: Robert discloses that the lead frame comprises copper or silver-plated copper (col. 13, lines 27-37 and col. 15, line 47).

Art Unit: 2875

Re claim 9-10: Robert discloses a GaN or AllnGaP based compound semiconductor and sapphire substrate (col. 19, line 60+ and col. 27, lines 35+).

Re claim 11-12 and 14: Robert discloses a flip-chip LED having no wire bond attachment (col. 20, line 15 ++).

Claim Rejections - 35 USC § 103

- 4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:
 - (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.
- 5. Claims 13 is rejected under 35 U.S.C. 103(a) as being unpatentable over Robert in view of Arndt (US 6,376,902 B1).

Re claim 13: Robert discloses four electric lead frames (205 in Fig. 17b). Robert does not disclose that the lead frame comprises three anode contact pads and one cathode contact pad. However, Arndt teaches that the lead frame comprises three cathode contact pads and one anode contact pad (Fig. 1A). Further, Robert teaches that the polarity can be reversed in some types of LEDs (col. 16, line 46). It would have been obvious to one having ordinary skill in the art at the time the invention was made to modify Robert's lead frame into the lead frame comprising three cathode contact pads and one anode contact pad as suggested by Arndt in order to increase heat conduction (col. 4, lines 65+).

Response to Arguments

6. Applicant's arguments with respect to claims 1-4 and 6-14 have been considered but are most in view of the new ground(s) of rejection.

Conclusion

7. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Guiyoung Lee whose telephone number is 571-272-2374. The examiner can normally be reached on M-F.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Sandra O'Shea can be reached on 571-272-2378. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
